Re: Election 2016

Dear Madam:

On December 19, 2016, the fate of the world lies in your hands. I think that most will agree that Hillary Clinton should have won the election and should be president. Nevertheless, this situation has become about stopping Trump. I can't imagine that any electoral college voter would be able to sleep peacefully at night knowing that we have an inexperienced president that is privileged to highly classified information and nuke codes. I can't imagine any of you being at peace knowing that Donald Trump and his inexperienced administration is going to erase eight years of world progress. In doing so, they may mess things up so bad not just for the economy, but for every federal and state agency that there will be no coming back from it nor anyway to fix it. The minorities which include the poor will suffer the most in healthcare, Medicare, and social security. Could you live with that on your conscious? Your decision to vote for Donald Trump could mean the destruction of the world as we know it. As a pastor, I can tell you that this is not the way God wants us to go. Although many churches and pastors voted for Trump, they did it for the wrong reasons. They did because Trump bribed them with the promise of repealing the Lyndon B Johnson Act (gag order) that sanctions churches from political participation under 501c (3). The hatred, racism, and bigotry by Trump regime must not stand. When I think of Donald Trump in power of the most important seat of America, it scares me. I see the United States not as democracy but dictatorship of upcoming third world country. Elizabeth Warren has submitted a petition to abolish you. I think that she will succeed if you don't reverse the decision of election. I employ you to think hard because millions of American lives hang on the cusp of your decision. Because of the enormous popular vote in favor of Hillary Clinton, I am requesting that you vote her in.

Sincerely,

Pastor Dean Barker
